- Blindspot alerts to driver and recording
- Blindspot traffic alert system
- GPS integration for Mapping, Detours, Alt. Routes

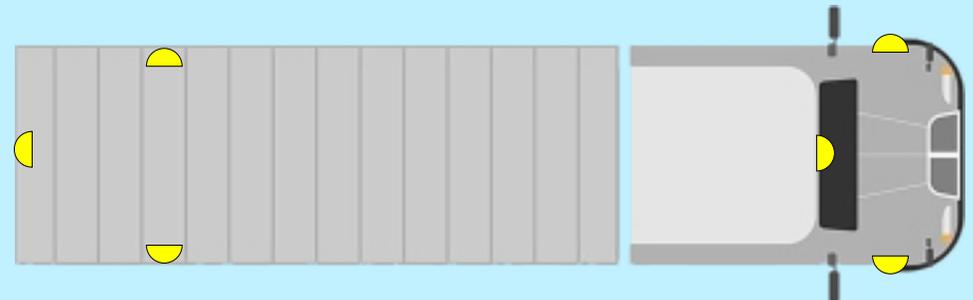

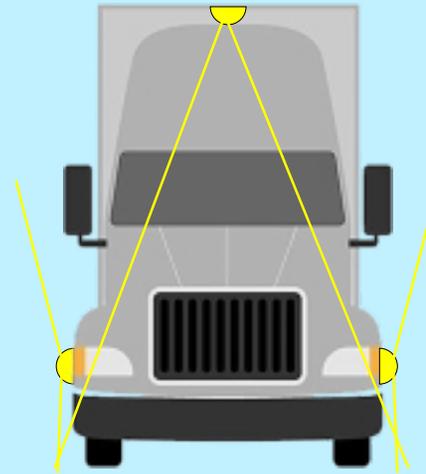

Options:

- Full time transmission
- Timed transmission updates
- Telemetry transmission and recording
- Licence Plate Recording
- Telephoto / Zoom lens

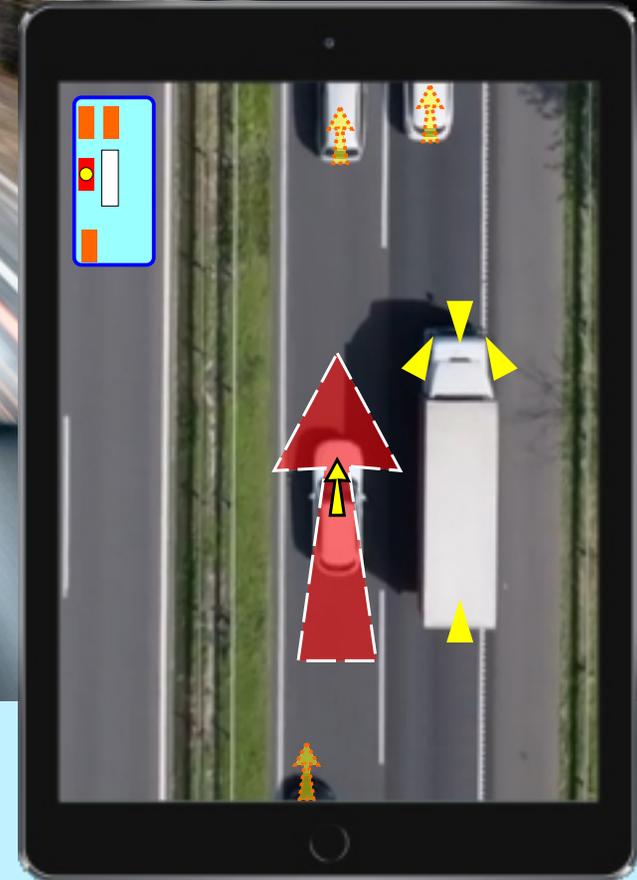

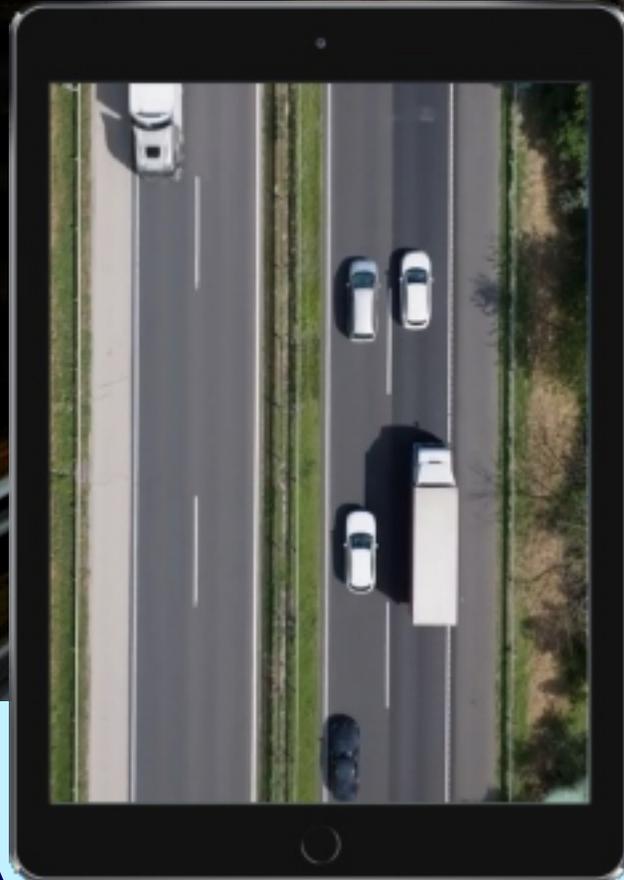

Using 4 or more wide-angle cameras mounted on the front, each side mirror and the rear, an Intelligent Surround View Monitor creates a virtual overhead view of the surroundings.

The Intelligent Surround View Monitor detects moving objects in real-time by performing image processing of the image signals from its cameras.

While not yet mandatory, all Box trucks and articulated vehicles need these devices fitted as standard. Reversing, Blindspot and Overhead coverage.
