

THE HORIZON IS CALLING

There is a romance to the road. The promise that you can go anywhere, sleep anywhere, and wake up to a world that belongs only to you. But true freedom requires space to breathe.

THE WALLS CLOSE IN

Standard van life demands a compromise. You trade the comfort of your home for the mobility of a vehicle. When the doors close, your world shrinks to the size of a parking space.

A Bolt-On Revolution

Enter the Van Extra. This isn't a trailer you tow; it's an architectural expansion you wear. A bolt-on attachment designed for Sprinter-class vehicles that transforms "drive mode" into a mobile estate.

Aerodynamic Profile

Zero-Footprint
in Drive Mode

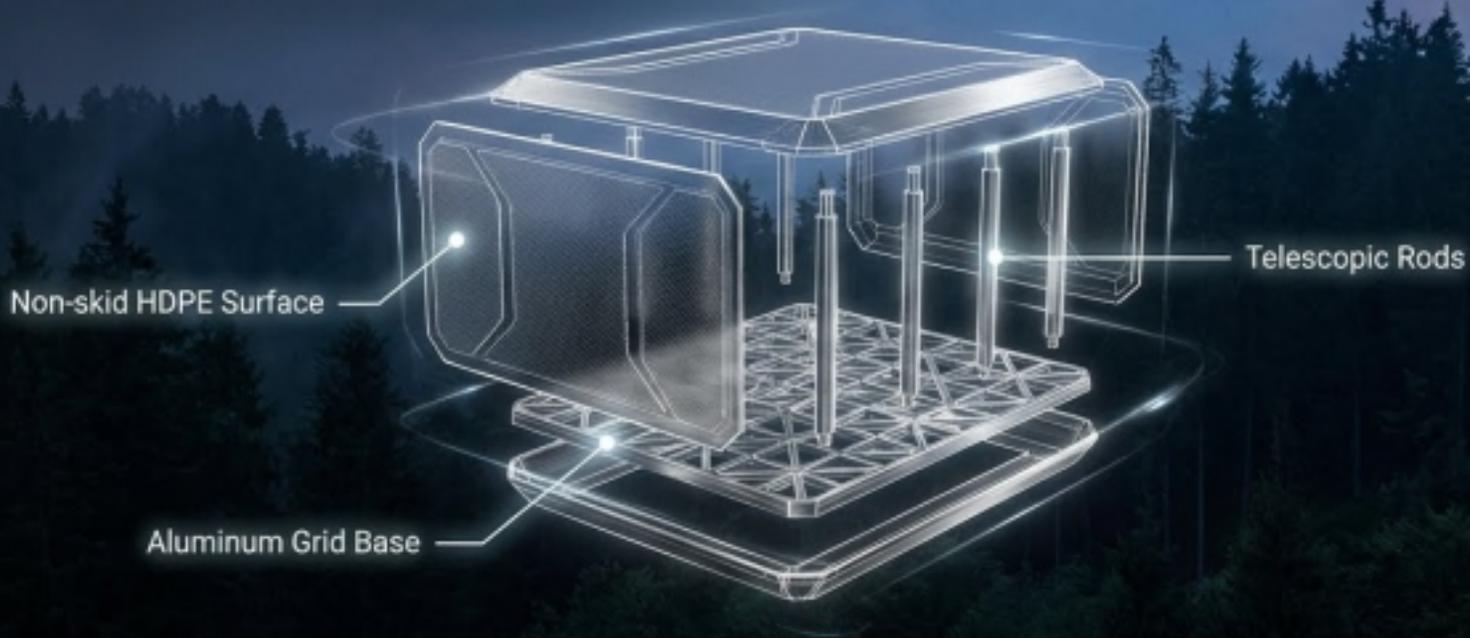

Chassis Bolt-On

Built for the Unforgiving Road

Engineered with an aluminum grid base and high-density polyethylene (HDPE) surfaces. Whether you are navigating highway speeds or washboard fire roads, the structure remains rigid, silent, and ready.

Stage One: Breaking the Boundary

Arrival is just the beginning. The side panel lowers, immediately dissolving the barrier between your interior living space and the outdoors.

Stage Two: Claim Your Ground

Fold-down legs with adjustable leveling feet anchor you to the earth. The structure stabilizes, creating a rigid platform capable of supporting life, gear, and movement.

Stage Three: The Open Space Mode.

Telescopic poles extend. The retractable awning glides out. In seconds, you have tripled your usable floor plan. You are no longer parking; you are residing.

A Fortress of Solitude.

Deploy the filtered shade canopy for weather relief or full canvas walls for privacy. Whether it's shielding you from the desert sun or creating a windbreak on a blustery coast, the deck becomes a protected sanctuary.

POWER WITHOUT COMPROMISE.

Embedded conduits deliver energy to the far corners of your deck. With integrated 110V AC outlets, USB-C charging ports, and a dedicated Battery Management System, you don't just sit outside—you plug in.

The Extendable Lifestyle.

It folds up like a picnic table, but opens like a home. Cook dinner in the open air, dry your gear on the extendable clothesline, and reclaim the rituals of daily life that the van used to restrict.

The Mobile Workshop.

The rigid platform supports more than just a chair. Transform your campsite into a field workshop, a mobile photo studio, or a trade show display.

Elevate Your Perspective.

The system integrates with telescopic arms to support a vehicle roof-mounted canopy or a walkable roof deck. Take your morning coffee to the upper level and watch the sun rise over the treeline.

Adapted to Your Aesthetic.

Height and width are variable to vehicle specifications. The finish can be matched to your chassis. It doesn't look like an add-on; it looks like it was born with the vehicle.

Maybe You Can Take It With You.

You don't have to choose between the freedom of the road and the comfort of a home base. With Van Extra, the horizon isn't just a line you chase—it's a place you inhabit.
